

• CRAFT/PROFESSION

Magali WICHT creates and sells a range of 100% natural wellbeing and skincare products: creams, balms, massage oils, shampoos and conditioners, home fragrances and mosquito repellent products, all produced in her small laboratory in Noumea. Magali works only with ingredients carefully chosen for their high quality and purity: essential oils, vegetable oils, plant butters and herbal and floral waters. All her ingredients are 100% natural and all are plant-based, apart from beeswax and clay which feature in the composition of some products.

Anutéa products are guaranteed to contain no chemicals, preservatives or dyes of synthetic origin.

• BACKGROUND

Magali is a qualified herbalist and biology lab assistant.

• INSPIRATION AND ART/DESIGNS

Constantly on the lookout for new and original ideas for her Anutéa range, Magali is also very conscious of the environmental impact of skincare and beauty products.

Nature is both her source of inspiration and the precious source of the ingredients she needs to create her products. So Magali takes care of nature: all her products are biodegradable and all bottles are made of recycled glass.
