## • CRAFT/PROFESSION

Gwenola LEGRUMELEC handcrafts decorative articles, using her technical skills to engrave and sculpt glass and eggs (ostrich, duck, emu, rhea and goose eggs...).

She designs a wide range of items, including lamps, hangings and candlesticks. Her designs are all original pieces and can be customised on request. Gwenola's designs are exquisitely delicate so her craft requires great precision and attention to detail.

## • BACKGROUND

Gwenola says her ever-curious nature led her to teach herself her craft. She loved drawing and painting and, aged 13, discovered Ukrainian Pysanky (decorated Easter eggs). Fascinated, and having the fortune to live near an ostrich farm, she began painting on eggs.

Later on, Gwenola spent time in Africa where she met up with artists working in metal artwork and carving, leading her to diversify

and develop her work. She was then also making ethnic-style lamps using a wide variety of materials. Once settled in New Caledonia, Gwenola established her brand and infused her designs with traditional local motifs.

## • INSPIRATION AND DESIGNS

In Gwenola's words: "I love using things I find in my designs and imbuing my materials with a sense of harmony". Gwenola is passionate about her craft and dedicates countless hours to her work but her greatest inspiration is the joy and delight of each customer who chooses one of her designs. She is just so happy to have passed on a little of her own passion.
