

UNIQUE ET NATUREL

• CRAFT/PROFESSION

Marion ALLEGRO creates beauty care products perfectly reflecting her brand name: unique and natural. All the products in her range are 100% natural, kind to our bodies and kind to the environment. They are enriched with natural butters and vegetable oils from around the world, with a touch of New Caledonia: coconut oil, beeswax, aloe vera, vanilla and honey...

Marion has set up her laboratory in a specialised room equipped with robots, precision scales, thermometers, hotplates and double boilers, all essential in processing and transforming her raw materials.

• BACKGROUND

Marion's passion for natural beauty care fired her determination to teach herself the skills she needed. Respect and protection of the planet have always been priorities for Marion, and she began by making natural products for her personal use. She was drawn to her craft by her desire and real yearning to raise

awareness about nature's immense potential and about ways of transforming her bounties into beauty care products fashioned from natural ingredients and active plant extracts.

• INSPIRATION AND ART/DESIGNS

Marion threw herself into an in-depth study of specialised books, articles and journals researching the virtues of oils, essences and plants. She is always on the lookout for new ideas and her range already comprises around thirty beauty care products for the face, body, hands, feet and even hair. Her products are designed to suit different skin types and for the whole family, a range including whips, creams, mousses, scrubs and oils... They are delicately scented with exotic fragrances such as passion fruit, ylang-ylang, coconut, hibiscus and neroli... or Mediterranean essences like peppermint, lavender, citrus and orange blossom. Marion also pays careful attention to feedback from her customers and the desires and needs they express in developing her range of products.
